301 Last Lost Time

#1 MED / Celanese next through dryer/calciner:

We were not able to replace the gearbox as scheduled and planned as we did not have the right piece of equipment. At this time we have placed the old gear box back in place. The dryer and spiral elevator require further TLC – see pictures on clean up instructions. Needs this done right away. Once completed, run fines through from P&S spiral through calciner. Contractor burner work completed (RAND 5/2/14).

Midnight shift: Wiped down lower level of P&S spiral, then advised to run fines through P&S spiral to the calciner discharge. Cleaned up 2nd floor around all equipment (spirals, hopper, scale, floor penetration to dryer). May need a final wash down. Walk through on Sunday and if OK, fire up calciner and dryer.

Day shift:

Afternoon Shift:

#1 RC / Celanese Trial:

Contractor work has been completed on the burner (RAND 5/2/14). We need to clean out the inside of the calciner some more – not clean enough. Need the syntron cleaned as well. Once everything is completed we will run fines through the dryer spiral elevator into the feed hopper for #1 RC. There will be no need to take out 3" dam per engineer.

Midnight shift: Some minor cleaning around calciner discharge and lower RC spiral, then advised to run fines through from P&S spiral to the calciner discharge. Also cleaned up around spirals, dryer belt, around calciner discharge...may need final touch-up. Walk through on Sunday and if OK, fire up calciner and dryer

Day shift:

Afternoon Shift:

Exhaust to F1

#2 MED line/ Cu-0360:.

We will be sucking up the 3819 from station #6 in powder room once we have run out of the four bags of material. We will start this line on Monday. Need to continue to make sure that we will be ready for it. We have removed the motor from #2 dryer and placed in #3 dryer.

Midnight shift: No activity

Day Shift:

Afternoon Shift:

#2 RC/ Cu-0860: Completed.

Brought down for maintenance. On 5/2/14 motor removed to install on dryer #3.

Midnight shift: No activity

Day shift:

Afternoon shift:

Exhaust to

#3 MED line / D 0768 next:

Still waiting on the dryer to get fixed.

Midnight Shift: Per Saturday's notes, down again due to erratic dryer temps. Kirk and IMC (Guy) notified...waiting for information/guidance

Day shift:

Afternoon Shift:

#3 RC/ D 0768:

Light calciner when we are running MED. Need to set up discharge bag and the fines drums.

Midnight shift: Holding (discharge and fines drum set up)

Day shift:

Afternoon Shift:

Exhaust to CTO

#4 RC / Selexorb:

Additional 14,000 lbs. of selexsorb is here. Start calciner feed once the calciner reaches proper temperature. **Make sure that we collect samples and have them at the lab on Saturday morning.**

Midnight Shift: Hold until Monday (hoist issues)

Day shift:

Afternoon Shift:

Exhaust to Trimer

PK Blender / 1506:

Confirm with John Bodmann as to how to use bags of 1505 to dry back the 1 wet batch that is still in building 9. See clean up instructions before re-starting impregs.

Midnight Shift: Finishing last few batches, and then will use 400 lbs dry-back material to work on last two bags of wet product in building 9 (per John Bodmann's instructions Saturday evening).

Day shift:

Afternoon Shift:

#5 RC / 1506:

Need to remember that we do not need 5A dust collector running with this product. We need to check the suction twice every shift. Make sure that we record in the SAP sheets the 114 bags being consumed.

Midnight shift: Stopped mid-shift to clear out roton (material spilled out bottom of drum on feed end). Also, getting odd suction numbers. Emailed Kirk to see if he can see anything on wonderware that could assist. May need IMC or maintenance to help. Hold until discussion with management/Kirk to verify if OK to run.

Day shift:

Afternoon shift:

Exhaust to Trimer

Old Pfaudler – D-0754:

Continue making batches. All of the precious metals are upstairs to run through the weekend.

Midnight Shift: Continue

Day Shift:

Afternoon Shift:

#6 RC / D-0754:

Continue to run material as available. Make sure that you check the MOD for the latest change to sampling requirements. Chemi samples must be gathered.

Midnight shift: Continue

Day Shift:

Afternoon shift:

Exhaust to Sly Scrubber

New Pfaudler / Celanese Trial

Pfaudler work on the oil leak was completed by Superior Erection on 5/2/14 (first shift).

Additional work taking place by Lucas on the vacuum arm. This work should be completed on 5/2/14 and be ready for Monday's trial.

Midnight shift: No activity. Confirm with day shift whether vacuum tower cleaning finished

Day shift:

Afternoon Shift:

HC-11 Tanks Cu-5020 :

The strikes have started. Continuing communication with the North is vital during this trial run. Issue with Heil Scrubber (work notification was written Sunday). Please be advised that on Wednesday the 7th of May, the Copper chiller will be worked on. This work will last aprox. 12 hours during which there will be no Strikes going on. Please schedule last strike to be sent to the North at around 2:00 am (...ish)

Midnight shift: Continue. Email sent to Jeff Lewis to advise that next bags of soda ash are smaller than current bags (1500 lbs compared to 2000 lbs). May need new batch sheets.

Day shift:

Afternoon Shift:

Abbe Blender – D-5206:

We can run on the weekend and off shifts. Make sure to read Grodecki's instructions at the end of the shift notes regarding how to match up the lots of 5202.

Midnight shift: Re-setting lid. Check day shift for leaks and if OK continue on.

Day shift:

Afternoon shift:

National Dryer / D-5206:

Make sure that we are taking the bags coming off the National dryer to the far railshed for the moment. We will not feed D-5206 to the calciner just yet.

Midnight Shift: Feed as material available

Day shift:

Afternoon Shift:

Tower 3 / DPT-101:

Loaded and running. Should come down sometime on Monday (5/5/14). This tower will be loaded with the last load of DPT-101

Midnight Shift: Continue...will confirm with Kristen whether reloading DPT 101 or Cu 0860

Day shift:

Afternoon shift:

Tower 6 / DPT-101:

Loaded and running. Should come down sometime tomorrow (Sunday the 4th). This tower will be loaded with Cu-0860.

Midnight Shift: Continue...will confirm with Kristen whether reloading DPT 101 or Cu 0860 (tower coming down 1st half of day shift Sunday)

Day shift:
Afternoon shift:

North Screener / DPT-101:

The North screener is set up and running. **Make sure that we hit the rate required.**

Midnight shift: Waiting on tower unloading for material to screen

Day shift:

Afternoon Shift:

South Screener / DPT-101:

Switch screener to DPT-101. **Make sure that we hit the rate required.**

Midnight shift: Waiting on tower unloading for material to screen

Day shift:

Afternoon Shift:

Tunnel Kiln #3 / Cu Carb testing:

Continuing to perform various tests at the request of engineer (Jack P.). Currently have another test going on. It will be unloaded and evaluated in the morning.

Midnight shift: Monitoring temps. Car 18 has two stacks loaded and will unload day shift.

Day shift:

Afternoon Shift:

Tunnel Kiln #4 / Cu-0540:

Completed

Midnight shift: Down.

Day shift: Down.

Afternoon Shift: Down

#2662 (east) Pill Machine / Zr-0403 1/8: Hold

Started to clean up and take apart machines in preparation for Zr material. We will use only one dust collector.

Midnight shift: No change

Day Shift:

Afternoon shift:

#2664 (west) Pill Machine / Zr-0403 1/8: Hold

Started to clean up and take apart machines in preparation for Zr material. We will use only one dust collector.

Midnight shift: No change

Day Shift: Afternoon shift:
--

PRIORITIES FOR WEEKEND.

- I. Safety and Environmental
- II. Towers - Keep screening going as needed to have empty bins
- III. 1 line Prep for Celanese - Light calciner and drier on Sunday so all works well
- IV. 5020 strikes
- V. 5 RC 1506 - WATCH RATE 15,600 PER DAY
- VI. 3 line - D-0768 - I talked to Guy last night, they are doing what they can, hope it is up today
- VII. 4 RC - Selectsorb make sure color and SA look ok run out what we have then cool to clean for D- 5206
- VIII. 6 RC and drier - D-0754
- IX. Tunnel Kilns - Cu-3818 P trials
- X. Abbe and National
- XI. PK 1506 as needed to support 5 RC
- XII. Cu-0360 wet mixing should start Monday- Jack to provide info on what to do
